## Barrington Hall The Steel Cut Coffee

Is just pure Mocha and Java prepared in a new way. The coffee berry is cut up (not ground) by knives of almost razor sharpness into small uniform particles. Thus it is not crushed, as by the old method of grinding, and the little oil cells remain unbroken. The essential oil (food product) cannot evaporate and is preserved indefinitely. This is one reason why a pound of Barrington Hall will make 15 to 20 cups more of full strength coffee than will any other coffee ground the old way; why it excels all other coffee in flavor and why it will keep perfectly until used.
